FOR IMMEDIATE RELEASE

Autotest Joins Ridgetop Group's Preferred Partner Program

St. Louis, MO - September 15, 2014

Autotest, Inc. a leading ATE firm focusing on Power Test applications announced that it has joined Ridgetop Group's Preferred Partner Program. Under the terms of the program, the firms will collaborate to deliver innovative ATE solutions for power system test and other applications.

Autotest was founded in 1977 and has established a large installed base of customers across the USA, primarily addressing difficult and complex power test applications. Ridgetop has developed ground-breaking solutions such as Sentinel Suite™, RingDown™, SMRT Probe™ and RotoSense™, to provide advanced diagnostics and prognostic technologies that will be made available to Autotest to incorporate into its comprehensive ATE test systems.

According to Robert Cox, CEO of Autotest, "We are very impressed with Ridgetop's pioneering test methods that have been introduced for critical aerospace electronic and electromechanical systems. We agreed to leverage our respective technologies to serve a wider base of customers."

Andrew Levy, Ridgetop's VP of Business Development commented, "We are very positive about Autotest joining our Preferred Partner program. Autotest is a well-established firm and we have a growing number of customers requesting turn-key test system solutions that incorporate our patented diagnostic and prognostic technologies. Autotest, with its long history of providing solutions and supporting ATE platforms, is an excellent supplier in this area."

Both Ridgetop and Autotest personnel will be attending the IEEE AUTOTEST conference in St. Louis, Missouri, September 15-18, 2014. Please visit booth #228 for additional details.

About Ridgetop Group

Ridgetop Group, Inc. founded in 2000, is a fast-growing supplier of advanced diagnostic and prognostic solutions for critical aerospace, semiconductor and medical systems. Customers include providers of aerospace systems, satellite systems and industrial internet applications in North America, Europe and Asia.
